

Obs: Esta configuração é necessária caso já possua um domínio e não queira apontar o DNS para o servidor da **Futura Sistemas**.

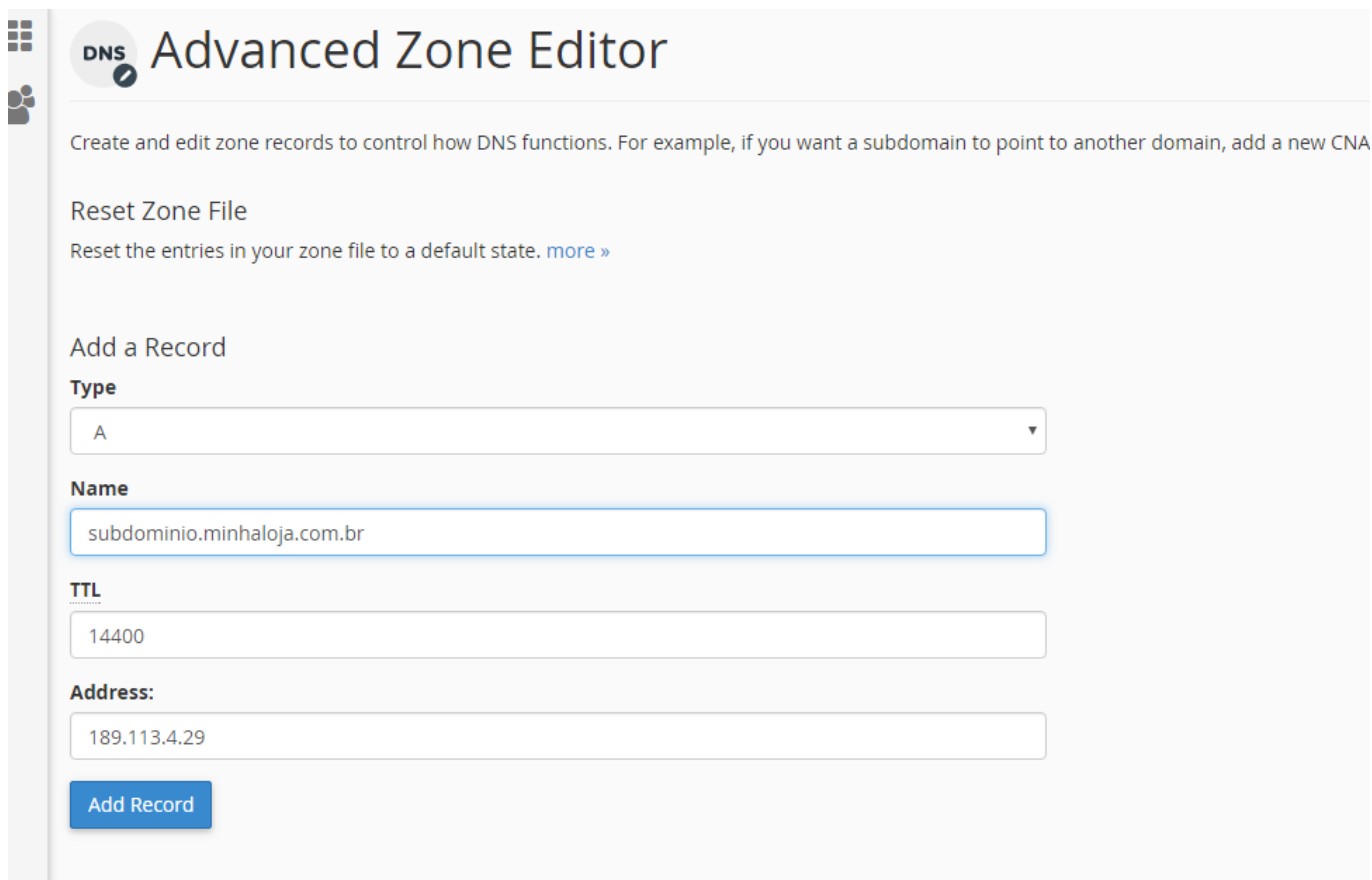

Acesse o **cPanel** da loja virtual, conforme mostra imagem abaixo:

No painel acesse (**Advanced Zone Editor**):

Preencha a **Zona DNS (Advanced Zone Editor)**, conforme mostra imagem abaixo:

The screenshot shows the 'Advanced Zone Editor' interface in cPanel. It includes a sidebar with a 'DNS' icon and a main content area. The main area has a header 'DNS Advanced Zone Editor' and a sub-header 'Create and edit zone records to control how DNS functions. For example, if you want a subdomain to point to another domain, add a new CNA'. Below this is a 'Reset Zone File' section with a link 'more »'. The 'Add a Record' section contains a 'Type' dropdown menu set to 'A', a 'Name' text input field containing 'subdominio.minhaloja.com.br', a 'TTL' text input field containing '14400', and an 'Address' text input field containing '189.113.4.29'. At the bottom of this section is a blue 'Add Record' button.

Name: Neste campo coloque o subdomínio que será apontado para o servidor da **Futura Sistemas**;

Address: Neste campo digite o endereço 1168.138.237.26

Em seguida, clique em **“Add Record”**, finalizando o procedimento.
